

Spray Foam Insulation

Superior air sealing and thermal performance for homes and businesses. Available in open-cell and closed-cell formulas, each with distinct advantages we'll match to your project.

R-7+

CLOSED-CELL, PER INCH

R-3.5+

OPEN-CELL, PER INCH

80+ yrs

EXPECTED LIFESPAN

100% MADE IN THE USA

We use only quality American-manufactured spray foam products. We do not use imported Chinese-brand materials on any job.

KEY BENEFITS

Air-Tight Seal

Both types expand to fill gaps, cracks, and irregular spaces that fiberglass and cellulose can't reach, stopping drafts at the source.

Mold & Pest Resistance

As an inert, non-organic material, spray foam removes the food source and pathways that pests and mold rely on.

Superior Noise Reduction

The soft, flexible cell structure of open-cell foam is especially effective at absorbing airborne sound between rooms and floors.

Long-Term Performance

Properly installed spray foam doesn't sag, settle, or lose R-value over time the way loose-fill materials can.

CLOSED-CELL ADVANTAGES

- Highest R-value per inch of common insulation materials
- Built-in vapor barrier — resists moisture intrusion
- Adds structural rigidity, strengthening walls & roof decks
- Best for rim joists, roof decks & below-grade areas

OPEN-CELL ADVANTAGES

- Expands to fill large cavities cost-effectively
- Best-in-class sound dampening between rooms
- Vapor-permeable, letting assemblies dry and breathe
- More flexible — moves slightly with the structure

KEY BENEFITS

Air-Tight Seal

Both types expand to fill gaps, cracks, and irregular spaces that fiberglass and cellulose can't reach, stopping drafts at the source.

Mold & Pest Resistance

As an inert, non-organic material, spray foam removes the food source and pathways that pests and mold rely on.

Superior Noise Reduction

The soft, flexible cell structure of open-cell foam is especially effective at absorbing airborne sound between rooms and floors.

Long-Term Performance

Properly installed spray foam doesn't sag, settle, or lose R-value over time the way loose-fill materials can.

CLOSED-CELL ADVANTAGES

- ✓ Highest R-value per inch of common insulation materials
- ✓ Built-in vapor barrier — resists moisture intrusion
- ✓ Adds structural rigidity, strengthening walls & roof decks
- ✓ Best for rim joists, roof decks & below-grade areas

OPEN-CELL ADVANTAGES

- ✓ Expands to fill large cavities cost-effectively
- ✓ Best-in-class sound dampening between rooms
- ✓ Vapor-permeable, letting assemblies dry and breathe
- ✓ More flexible — moves slightly with the structure

R-values, coverage, and best-use cases vary by product; ask your estimator which type fits your project.
